To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. About Scopus Author Identifier

Na wyświetlonej liście autorów dla wybranego wcześniej nazwiska należy zaznaczyć jedną formę zapisu nazwiska lub kilka wersji (np. nazwisko z pełnym imieniem lub imionami, z inicjałami imion, z pełnym pierwszym imieniem i inicjałem drugiego imienia, użytymi znakami diakrytycznymi itp.). Identyfikując autora warto zwrócić uwagę na dziedzinę oraz afiliację. Zaznaczone formy nazwiska system połączy i będą one stanowiły podstawę dalszych wyszukiwań.
